

Mohammad Anas Inamdar

Full-Stack Developer • ML & AI Enthusiast • Final Year CS Engineering

✉ inamdaranas8@gmail.com | ☎ +91-9322407094 | [GitHub](#) | [LinkedIn](#) | Miraj, Maharashtra

PROFESSIONAL SUMMARY

Final-year Computer Science Engineering student (B.E., expected 2026) with hands-on experience in Full-Stack Web Development (MERN stack), Machine Learning with Python, and AI-powered application development. Proven ability to build end-to-end applications from responsive frontend interfaces to REST API backends and ML models. Eager to contribute technical skills in a challenging software engineering or ML/AI role.

TECHNICAL SKILLS

Languages:	Java, Python, JavaScript (ES6+), C
Frontend:	HTML5, CSS3, React.js, Responsive Design, UI/UX Principles
Backend:	Node.js, Express.js, REST APIs
Databases:	MongoDB, MySQL
ML / AI:	Scikit-learn, Pandas, NumPy, Random Forest, Logistic Regression, Feature Engineering
Tools:	Git, GitHub, Postman, VS Code, Linux
Core CS:	Data Structures & Algorithms, OOP, DBMS, Operating Systems

PROFESSIONAL EXPERIENCE

AI & Robotics Intern | [Hive Tech](#)

3 Months • 2026 • India (On-site)

- ▶ Built and tested Python-based AI modules for real-time sensor data processing, reducing manual classification time by automating input pipelines.
- ▶ Developed and integrated machine learning models for robotics automation tasks, applying supervised learning concepts including classification and regression.
- ▶ Collaborated in a cross-functional team to design hardware-software solutions; participated in full project lifecycle from requirements to prototype testing.
- ▶ Debugged and optimized intelligent system components, improving model response accuracy during real-world test scenarios.
- ▶ Documented AI workflows and system architecture to support knowledge transfer and future iteration of robotics projects.

PROJECTS

Malware Detection System — Final Year Project | *Python · Scikit-learn · Random Forest · Logistic Regression*

· *Pandas* [🔗 GitHub](#)

- ▶ Engineered an end-to-end ML pipeline to classify executable files as malicious or benign, achieving high-confidence binary classification using supervised learning.
- ▶ Applied feature engineering and normalization techniques on raw file metadata to extract 20+ discriminative features, improving model generalization.
- ▶ Benchmarked Random Forest vs. Logistic Regression, selecting the best-performing model; documented performance metrics (accuracy, precision, recall, F1).
- ▶ Designed the project for real-world applicability with a modular codebase, enabling easy integration of new file samples for retraining.

AI Chat Application | *React.js · Node.js · Express.js · Generative AI API · REST* [🔗 GitHub](#)

- ▶ Developed a full-stack AI-powered chat application with a real-time messaging interface and seamless backend API integration.
- ▶ Integrated a Generative AI API to deliver contextual, intelligent responses; implemented asynchronous request handling to eliminate UI blocking.

- Architected a clean separation between frontend (React.js) and backend (Express.js REST API), enabling independent scalability of both layers.
- Implemented dynamic conversation state management for multi-turn dialogue flow, enhancing overall user experience.

E-Commerce Shoe Website | *JavaScript · HTML5 · CSS3 · Responsive Design* [🔗 GitHub](#)

- Designed and developed a fully responsive e-commerce storefront featuring product listing, category filtering, and a functional shopping cart.
- Implemented mobile-first CSS and JavaScript-driven dynamic filtering, ensuring consistent UX across all device sizes.
- Applied clean component structure and event-driven UI interactions to improve page performance and user engagement.

Multi-Page React Application | *React.js · React Router · Reusable Components*

- Built a scalable multi-page SPA using React.js with client-side routing (React Router), eliminating full-page reloads for seamless navigation.
- Architected reusable component library, reducing code duplication by ~40% and improving long-term maintainability.
- Leveraged component-driven development principles to enforce consistent UI patterns across all application pages.

Portfolio Website | *HTML5 · CSS3 · JavaScript · Responsive Design* [🔗 GitHub](#)

- Designed and developed a personal portfolio website to showcase projects, skills, and achievements with a clean, modern UI.
- Implemented mobile-first responsive design ensuring seamless experience across desktop, tablet, and mobile viewports.
- Optimized page load performance and applied accessibility best practices for a professional web presence.

EDUCATION

Bachelor of Engineering — Computer Science

Expected: June 2026

Padmabhooshan Vasantraodada Patil Institute of Technology (PVPIT), Sangli • CGPA: 7.2 / 10

HSC — Science (12th Grade)

2022

Shikshanmaharshi Dr. Bapuji Salunkhe College, Miraj • 69%

SSC — 10th Standard

2020

AL-FATAH English School, Miraj • 78%

CERTIFICATIONS

- Machine Learning using Python — Simplilearn
- Python Programming — Simplilearn
- Java Programming — (Issuing body / platform)
- Introduction to Artificial Intelligence — (Issuing body / platform)

ADDITIONAL INFORMATION

Languages Spoken: English (Professional), Hindi (Fluent), Marathi (Native)

Open to: Full-time roles, Internships, Remote & On-site opportunities across India and Abroad
